

**ABSTRACT****TURBOFAN ARRANGEMENT**

5 A bypass turbofan engine comprises a first propulsion  
system and a second propulsion system. The first  
propulsion system comprises a first fan rotor, a core  
engine, a first low pressure turbine and a first fan shaft  
drivingly connecting the first turbine and the first fan  
10 rotor. The second propulsion system comprises a second fan  
shaft drivingly connecting to a second fan rotor and the  
first propulsion system and arranged so that the first and  
second shafts are not coaxial with one another.
